OFFICE 365/TEAMS

Parents, students are required to use the TEAMS platform to submit their attendance, take tests, and submit their assignments.

If the student does not have a laptop, tablet, or iPad the student can use their phones. They will need to download the TEAMS app.

The platform also has other apps (Word, Excel, PowerPoint) housed in it for the student's use. If the student does not have these apps on their devices that can access them through the platform to complete tasks/assignments.
